Panel Van

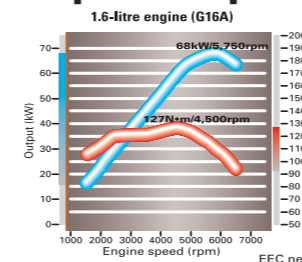

Way of Life!

The ideal partner

Suzuki's APV Panel Van is the ideal choice for today's—and tomorrow's—light-commercial and fleet businesses, offering more interior space, plus better performance, durability and reliability; all that and passenger-car comfort, too. Yet the APV Panel Van is still nimble enough to meet the diverse needs of its users.

Spirited performance meets demands

Aluminium 1.5- and 1.6-litre 16-valve engines are extremely fuel-efficient yet deliver exceptional output and torque when required.

The compact and lightweight **front MacPherson strut & coil spring suspension** is specifically tuned for straight-line stability.

Large 14-inch tyres are fitted to **steel wheels** with five mounting bolts for increased durability.

All-round utility satisfies expectations

Full-width tailgate swings upwards with ease, while the **flat floor** maximises cargo capacity.

Front door step boards and **front passenger's access support grip** ease cabin entry and exit.

Handy cockpit compartments, like **glove box** and **driver's side storage pocket**, keep small items within easy reach.

Comprehensive safety ensures confidence

Suzuki's **TECT body** directs collision-impact energy away from the cabin, with the nose acting as a buffer for increased protection. **TECT**

Rigid cabin construction incorporates **side impact door beams** to help protect occupants and cargo in side collisions.

The APV Panel Van is equipped with reliable **ventilated disc brakes** in the front and reliable **drum brakes** in the rear.

Headlamps and tail-lights are well elevated for better all-round visibility plus reduced vulnerability in minor collisions.

The **high-mount stop lamp** helps prevent rear-end collisions by alerting trailing drivers to imminent stops.

The instrument panel looks like that of a passenger car, with all major controls and compartments smartly placed for ideal functionality.

The slide- and reclining-adjustable seats feature adjustable head restraints for added comfort.
